

# **Ultrasone Go hovedtelefon Travel style**

## **Ultrasone Go**

Mobil hovedtelefon fra Tyske Ultrasone i høj kvalitet, flot design, samt god komfort.  
5 års garanti.

Ultrasone mobile Go fascinerer med sin elegante sort og sølv design.  
Øre kopper er prydet med aluminium plader i høj kvalitet med diamant-cut logo.  
Go er specielt udviklet til iPods, MP3-afspillere og andre bærbare musik kilder og mobilt udstyr.  
Du kan bære Go som et stifuldt tilbehør rundt om halsen eller fold den op på næsten ingen tid klar.  
Den specielle folde teknologi betyder at Go kræver minimal opbevaringsplads.

Ultrasone Go mobile hovedtelefoner er ydviklet med fokus på lydgengivelse i den højeste professionelle lydkvalitet.  
Den patenterede S-Logic® Natural Surround Sound teknologi, giver dig mulighed for at nyde stemmer og musik 3-dimensionelt, uanset hvor du er.  
Hovedbøjlen er nem at justere til en behagelig og stabil pasform.  
De afprøvede og testede protein læder ørepuder tilpasser sig stramt dine ører og sikrer behagelig slid komfort.  
Go er udstyret med en aftagelig 1,15m kabel med guldbelagt stereo jack, herunder mikrofon og fjernbetjening.

Med Go som din følgesvend vil du være klar til noget, når som helst.

- Principle: dynamic, closed
- S-Logic® Basic technology
- Impedance: 32 ohms
- Driver/Driver size: PET, 40mm
- Frequency range: 20 - 20000 Hz
- SPL: 96 dB
- Weight (excl. cord): 133g
- 5-years warranty

#### **-Logic® Natural Surround Sound - To hear is like to see: 3-dimensional**

Unique? Yes! Revolutionary? Definitely! The patented S-Logic® technology is described as Natural Surround Sound System. No other digital surround system can compare with this standard. As the sound of a normal headphones will sound direct and even on both sides, the S-Logic® system pushes the sound around your head! It appears as though you are listening to speakers meters away. Even at very low levels, this spacious sound allows you to hear and listen to each and every individual sound. And on top of that, the S-Logic® technology does not require additional equipment!

How does S-Logic® Natural Surround Sound work?

S-Logic® sends music around your head not just into it, because this technology uses decentralized driver positioning. Did you know that you use and need the outer ear for your three-dimensional understanding to define the direction and distance where a sound comes from? Instead of hitting the inner ear directly, with S-Logic® the signals are reflected off the surface of the outer ear in different directions before entering the auditory canal to create a natural three-dimensional Sound. S-Logic® is the only headphone system which includes your entire sense of hearing. S-Logic® does not change your personal hearing, it intensifies it for your individual needs and listening pleasure. S-Logic® does neither need artificial echo nor digital sound processing or cross over run time delay. You can hear the sound just the way the sound engineer has mastered it.

S-Logic® does not only create a Natural Surround Sound sensation. S-Logic® allows at the same time a reduction of sound pressure levels at the eardrum by up to 40% (3 - 4 dB). This may reduce the risk of hearing damage while ensuring hours of fatigue-free listening.
